

# TEEMU AITOMERI

## WEB DEVELOPER

## PROJECTS

### Yatzy

TypeScript, React, NodeJS, ExpressJS, MongoDB

Fully responsive old-school game of Yatzy. It keeps track of the top scores for guests, your scores, and all the registered users.

### Bag

TypeScript, React, Bun, ElysiaJS, MongoDB

A budget tracking app allows you to monitor and analyze your expenses, categorizing them into various income and expenditure categories. The visualization of expenses is done using ChartJS.

### Hypertube

React, NodeJS, ExpressJS, PostgreSQL, Docker, TailwindCSS

Streaming service that allows users to search, watch and comment on videos. The video player is integrated into the site and videos and subtitles will be downloaded through the BitTorrent protocol.

- Developed in a group of three in 4 weeks
- I focused on OAuth -login, videos, subtitles and database planning
